

**Black Gold**  
Bitumen

BlackGold

# About us

**Black Gold** started its activities in 2013 in the field of production and export of various types of bitumen. The expertise we have gathered over the last years in handling Bitumen Production across the world, has been the motive for this venture. **Black Gold**, with suitable infrastructures including a factory in Isfahan, Iran with an area of over 65,000 square meters, has a daily production capacity of 3,000 tons of bitumen and storage of vacuum bottom and bulk bitumen exceeding 10,000 tons.

It will be our endeavor to continuously improve and exceed customer expectations through quality excellence so that we are benchmarked amongst the very best.

**Black Gold** also has 3 modern drumming lines with a production capacity of 15,000 drums per day, 4 packaging areas with a daily packaging capacity of 1,500 tons of bitumen, and a professional and experienced production and execution team, making it one of the largest bitumen producers in the Middle East.

# Our Vision

We recognize that the industry scenario is ever-changing with the constant evolution of demanding applications. And our R&D Center is at the forefront of implementing those stringent applications with any new technology requirements.

Our Quality Assurance department diligently pursues opportunities for improving the production efficiency, while many producers focus on cutting corners to save costs, we remain true to our core design principles that in the long term provide measurable benefits for our customers.

In addition to a commitment to excellence for our customers, we also offer incomparable value at a fair price and provides some of the quickest delivery times in the industry.

The focus of **Black Gold** on management, quality, and fast delivery time has attracted reputable international customers. So that the production and export volume in the past years has reached more than 500,000 tons to Asian countries and Africa. With its capabilities, this company can have a more effective role in the international market and increase its sales capacity.

# Company Philosophy

We cultivate an open and entrepreneurial mindset in all that we do. We work collaboratively with each other and our partners to win together. We work with rigor, simplicity and agility to deliver exceptional results. Propelling our company and the industry forward takes passion and expertise.

## Our Advantages:

With a full staff of professional engineers, a technical sales team and certified service technicians, **Black Gold** is more than a producer – we are your partner for creating the ideal custom solution from start to finish.

# Why Choose Black Gold?

## Fast Worldwide Delivery

Beside Outstanding Product Integrity, **Black Gold** has maintained its position as the top bitumen non-governmental producer in Iran by operating an extensive network of sales worldwide.

We have no minimum order quantity for our all our grades of bitumen. With our mature transport system, we guarantee fast delivery time so you will receive your requests without delay.

## Excellent Customer Service

At **Black Gold**, we believe in developing a long-term relationship with our clients. As a leading bitumen producer, we work as partners on your projects, providing optimum solutions and high-quality grades of bitumen.

# Products

**1 Penetration**

**2 Performance**

**3 Viscosity**

**4 Emulsion**

**5 Modified**

**6 Soluble**

**7 Customized**

# Laboratory

The quality control laboratory of **Black Gold** is equipped with the latest and most modern equipment and facilities for testing and quality control of bitumen. The laboratory has specialized and professional personnel who are capable of conducting necessary tests and preserving and presenting samples according to customer requests. The products produced by this company are internationally recognized for their quality and excellence, and this is thanks to its well-equipped laboratory and accurate tests.

In order to produce various grades of penetration, viscosity, and PG bitumen, we obtained the ISO/IEC 17025 standard from the National Standard Organization of Iran in 2013.

Therefore, **Black Gold** is capable of analyzing and issuing national quality and quantity certificates.

**We offer you healthy and  
Clean bitumen with  
Environmental standards.**

# Packaging

- **Steel barrel (with a scale of 100 to 210 kg):** Metal steel barrels are widely used as the main method of tar packaging.
- **Poly bags:** with low packaging cost, light weight of packages, and ease of transportation of bags.
- **Pallets:** The black gold trade development company has the ability to palletize barrels upon customer request. However, it should be noted that in this case, the capacity of each container is only 80 barrels.
- **Bitumen carriers:** Bitumen carriers are essentially containers used for transporting large amounts of cold tar. Bitumen carriers are suitable for storing and transporting road construction tar. The net weight capacity of each bitumen carrier is 22 tons, so higher capacity carriers help reduce transportation costs per metric ton.

## Barrel production:

The barrel production and painting unit of **Black Gold** has 3 modern production lines with a daily production capacity of 5000 barrels per line (a total daily capacity of 15,000 barrels).

# Transportation

**Black Gold** has the capability to package, load, and deliver at least 1500 tons of bitumen in a rotational manner in one day.

There are over 50 tanker trucks equipped to transport bulk bitumen, making it the largest land transportation fleet for bitumen in Iran.

This fleet is capable of transporting molten bitumen from Black Gold Factories in Isfahan, Iran to all parts of the country, land borders, and destinations outside the country.

The company has units for delivering bitumen to customers, facilitating transportation, preserving and consuming bitumen, optimizing and developing the bitumen transportation fleet.

The speed of delivery and the security of transportation are the characteristics of this transportation fleet.

The unloading, packaging, and loading units of **Black Gold** have 4 drumming areas for unloading bitumen and filling drums, with two fields having a capacity of 1200 tons and two other fields having a capacity of 700 tons.

Other sections of **Black Gold** include suitable platforms for unloading bulk bitumen, a heating position with a capacity for 25 trucks, and other excellent features considered for this unit.

**Black Gold** also has 15 bulk bitumen loading showers.

# Ordering Procedure

- Request for a quotation and send LOI
- Receive a quotation
- Advance payment
- Make a contract
- Shipping arrangement
- Receive product

**Black Gold** has been able to export its products to more than 20 Asian and African countries in various packaging. In order to improve the quality and ease of product delivery, the company provides internal transportation, customs services, and clearance services to its customers.

The exports of **Black Gold** during the past years have amounted to over 500,000 tons of bitumen to Asian and African countries, which has contributed to the country's foreign exchange earnings.

**A VISION OF  
EXCELLENCE.**

# Work With Us

The **Black Gold** brand is represented in all over the Middle East. The corporate structure demonstrates the uniformity of the companies within the **Black Gold** brand regarding the distribution of products. All contracts under the name **Black Gold** plus a country-specific supplement.
